LIQUID CONTAINMENT SPECIALISTS

SEALING & CLOSURES

PRODUCT CATALOGUE · 2026

Caps, gaskets, vented and non-vented closures, child-resistant caps and flame arresters. The parts that fail first and cost least to replace.

ABOUT THIS CATALOGUE

SOURCED TO THE SAME SPECIFICATION AS THE CAN.

Fortitude21 is an industrial liquid containment manufacturer and wholesale supplier, managed from Singapore by JCDC Ventures Pte. Ltd. Its factories in Vietnam and China make jerry cans, fuel and water cans, chemical containers, pails, buckets and tins to one specification. It also supplies the closures and accessories, spill containment and drum handling equipment that go with them, sourced to that specification.

QUOTE THE PART NUMBER

Every code here is a Fortitude21 part number. Quote it with the quantity and we price that exact item.

MATCH THE FITMENT

Tell us the can, drum or IBC it has to fit, with the thread or neck size if you have it. We confirm the fit before you order.

ASK FOR THE DOCUMENTS

We send the test and compliance documents we hold for the model you order, not a general claim.

CONTENTS

01 **CAPS, CLOSURES & GASKETS** — F21-AC · The sealing path, sold as parts. — ACCESSORY · SEALING — 03

02 **CHILD-RESISTANT CLOSURES** — F21-ACR · A compliance component rather than an accessory. — ACCESSORY · COMPLIANCE — 03

03 **FLAME MITIGATION DEVICES** — F21-AFM · A flame arrester sits in the neck and stops flame propagating back into the container. — ACCESSORY · COMPLIANCE — 04

Dimensions are L × W × H unless a table says otherwise. Dimensions and weights are nominal; weights are empty. Lead time: Approximately one month for a standard production run; samples in 7–15 days. Confirmed against your specification at quotation. Minimum order quantity and price are quoted on enquiry. Test and compliance documents are supplied for the design and run you order; we send the documents we hold, not a claim. Every product links to its page on fortitude21.com, which carries the current figures. This edition: 20 November 2026.

09 SEALING & CLOSURES

Caps, gaskets, vented and non-vented closures, child-resistant caps and flame arresters. The parts that fail first and cost least to replace.

F21-AC

CAPS, CLOSURES & GASKETS

The sealing path, sold as parts. The gasket is what actually fails on an old can, and it is the cheapest thing on this site to replace.

SUPPLY	Sourced to our specification
CAP SIZES	DIN 45, DIN 51 and DIN 61
VENTING	Vented and non-vented
TAMPER EVIDENCE	Tamper-evident ring available
LINERS	Cap liners specified to contents
GASKETS	Replacement gaskets per can family
QUOTED ON ENQUIRY	Minimum order quantity, Price

Before you order: Cap liner and gasket material must be matched to the contents, particularly for food-contact and solvent applications. Tell us the substance.

Current figures and documents: **fortitude21.com/product-caps-closures-gaskets**

F21-ACR

CHILD-RESISTANT CLOSURES

A compliance component rather than an accessory. The United States requires a child-resistant closure on portable fuel containers, and without one the fuel range cannot be sold there.

SUPPLY	Sourced to our specification
PURPOSE	Child-resistant closure for portable fuel containers
REFERENCE REQUIREMENT	United States: 16 CFR Part 1460, which adopts ASTM F2517
SCOPE OF THE REQUIREMENT	Petrol, kerosene and diesel containers up to 8.45 US gallons (32 litres)
FITMENT	Matched to the neck of the can it is sold against
QUOTED ON ENQUIRY	Certification held, Minimum order quantity, Price

Before you order: Compliance is certified per closure and per container design. We will tell you exactly what we hold and what we do not before you commit to a US programme.

Current figures and documents: **fortitude21.com/product-child-resistant-closures**

F21-AFM

FLAME MITIGATION DEVICES

A flame arrester sits in the neck and stops flame propagating back into the container. The United States requires one on portable fuel containers, and a standard NATO can has no provision for it.

SUPPLY	Sourced to our specification
PURPOSE	Impede flame propagation into a portable fuel container
REFERENCE REQUIREMENT	United States: 16 CFR Part 1461, which adopts ASTM F3326 for containers sold empty
FITMENT	Neck-mounted, matched to the can it is sold against
MATERIAL	Metal mesh arrester
QUOTED ON ENQUIRY	Certification held, Minimum order quantity, Price

Before you order: Compliance is certified per device and per container design. Confirm what is held for your specific combination before committing to a US programme.

Current figures and documents: fortitude21.com/product-flame-mitigation-devices

ENQUIRE NOW

TELL US THE CAN. WE'LL MATCH THE FITTING.

Send the part numbers and quantities, what goes in the container, and the destination country or port. We will come back with a specification sheet and a quotation, and a number rather than a brochure figure.
